July 2013: Economic Sentiment continues to brighten in the euro area and the EU

In July the *Economic Sentiment Indicator* (ESI) increased by 1.2 points in the euro area (to 92.5) and by 2.4 points in the EU¹ (to 95.0), continuing the upward trend observed since May.

Euro area developments

In the euro area, the ESI's increase was driven by improved confidence among consumers and managers in industry, services and retail trade. Only in the construction sector confidence weakened. Economic sentiment improved in four out of the five largest euro area economies, i.e. Italy (+2.9), Spain (+1.2), France (+1.2) and Germany (+0.7), while it deteriorated in the Netherlands (-2.0).

The slight increase in **industry confidence** (+0.6) resulted from improvements in managers' *production expectations* and their assessment of the current level of *overall order books*. The assessment of the *stocks of finished products* remained virtually unchanged. Of the surveyed items not included in the confidence indicator, the sharply improving assessment of the *past production* stands out. The assessment of the current level of *export order books* remained stable. **Services confidence** saw the sharpest increase of all sectors covered (+1.8), driven by improved assessments of the *past business situation* and *past demand*, while *demand expectations* remained virtually unchanged. **Consumer confidence** improved markedly (+1.4) and for the eighth successive month. This was mainly due to further easing *unemployment expectations* and better *savings expectations over the next 12 months*. Consumers' views on the future *financial situation* of their households and the *future general economic situation* also brightened somewhat. **Retail trade confidence** increased (+0.9), driven by an improved assessment of the *present business situation* and *business expectations*, while views on the *volume of stocks* remained virtually unchanged. The **construction** sector stands out with lower confidence (-1.0), resulting from managers' markedly worsened assessment of *order books*, which failed to be counterbalanced by the more cautious upward revision of *employment expectations*. **Financial services confidence** (not included in the ESI) increased by 3.1 points. While the *past business situation* and *past demand* were assessed much more positively, *demand expectations* deteriorated.

Employment plans were revised upwards in industry, retail trade and construction, while remaining virtually unchanged in services. **Selling price expectations** increased in industry, while remaining broadly unchanged in services and retail trade and decreasing in construction.

EU developments

In the wider EU, the improvement in sentiment was more pronounced (+2.4). On a sector basis, the increases in industry, consumer and retail trade confidence were sharper than in the euro area and construction confidence slipped only slightly. On a country basis, the main reason for the sharper plus was markedly improving confidence in the largest non-euro area EU economy, the UK (+6.9). Contrasting with developments in the euro area, the EU financial services confidence indicator declined slightly (-0.4).

As in the euro area, employment plans in the EU were revised upwards across all sectors except for services. Selling price expectations differed in the EU in that they decreased in retail trade and increased in construction. Consumers' price expectations were revised downwards, in line with assessments in the euro area.

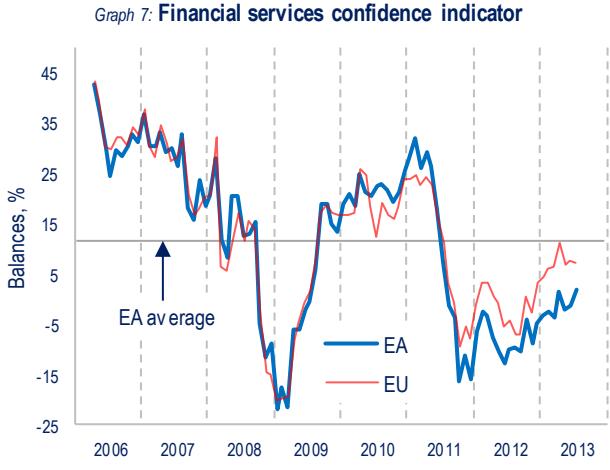

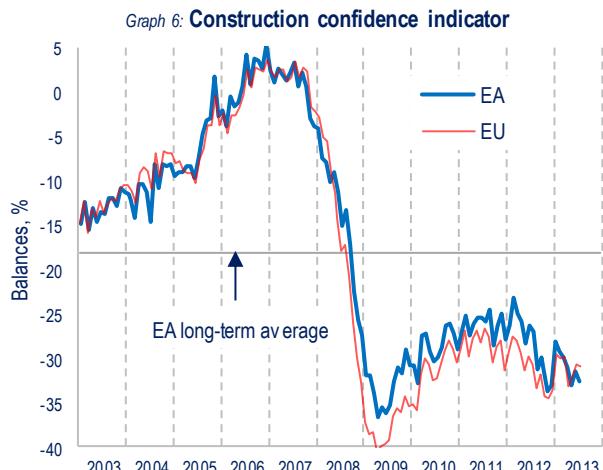

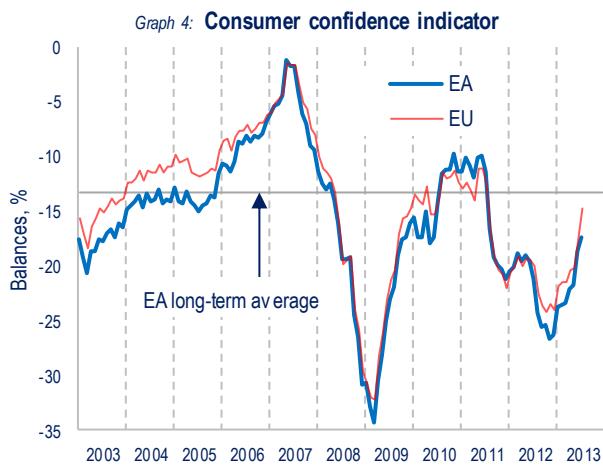

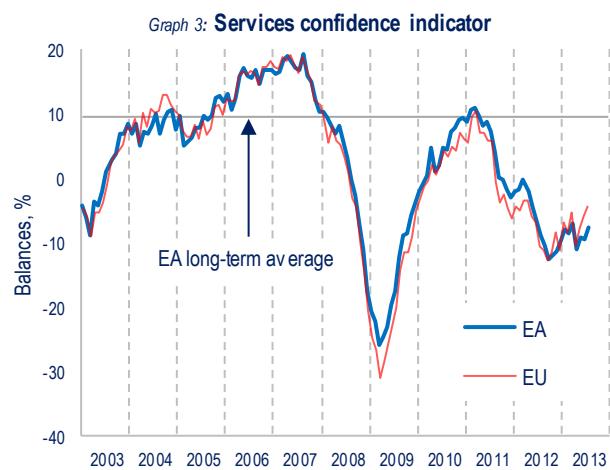

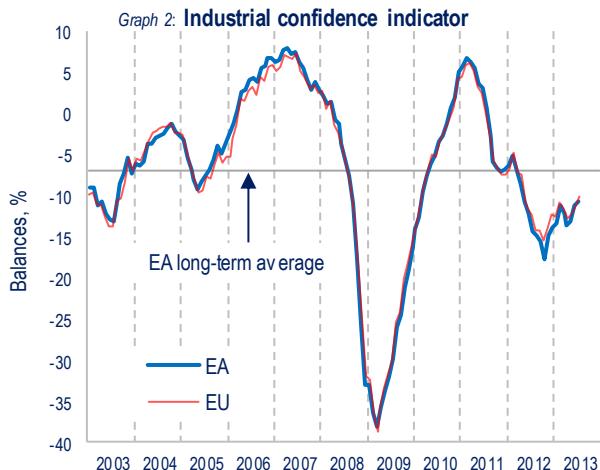

¹ Following its accession to the EU on 1 July, Croatia is included in the EU aggregate. Historical values and country weights have been revised accordingly.

Quarterly survey in manufacturing (conducted in July)

In the euro area, managers' assessment of developments in overall *new orders* improved markedly after last quarter's deterioration. Complementing an improved appraisal of their *competitive position on foreign markets outside the EU*, managers also revised their *export volume expectations* upwards (for the third consecutive quarter). In line with these findings, the figures show an increase in the *number of months assured by orders on hand* compared with the previous survey carried out in April. Also the balance of managers reporting more than sufficient, rather than insufficient, *production capacity* decreased and, accordingly, the estimated rate of *capacity utilisation* increased to 78.3%.

Developments in the wider EU were largely in line with euro area developments. It is noteworthy that July's reading of the *number of months assured by orders on hand* marked a new historic height in the EU.

The combination of positive developments in new orders, a rise in the number of months assured by orders on hand (in the EU even to historically high levels) and increasing capacity utilisation appears to point to a pending exit of the manufacturing sector from recession.

In the tables: (s.a.) = seasonally adjusted, (n) = not seasonally adjusted, : = not available

(*) Minimum, maximum and averages are calculated over the period of availability which is not necessarily as from 01/1990.

The economic sentiment indicator is composed of the industrial confidence indicator (40%), the service confidence indicator (30%), the consumer confidence indicator (20%), the construction confidence indicator (5%), and the retail trade confidence indicator (5%). Its long term average (1990–2012) equals 100. The reported ESI average is based on this standardisation sample. All confidence indicators are balances. Following the last annual update in January 2013, the country weights have been updated once more in July 2013, to reflect the accession of Croatia on 1 July.

(*) Minimum, maximum and averages are calculated over the period of availability which is not necessarily as from 01/1990.

(a) The indicator is the arithmetic average of the balances (%) of the questions on production expectations, order-books and stocks (the last with inverted sign).

(b) Highest figure is considered as a minimum, lowest figure is considered as a maximum.

TABLE 2a: Quarterly survey of manufacturing industry

(Data collected in January, April, July and October each year.)

Capacity utilisation in manufacturing industry (%)

(Question 13)

(a) Answers to the questions whether, taking into account the level of order-books or production, capacity is more than sufficient (+), sufficient (=) or less than sufficient (-). Thus, negative balances (capacity less than sufficient) indicate high levels of capacity utilisation, whereas positive balances (capacity more than sufficient) are associated with low levels of capacity utilisation.

(b) Balances: i.e., differences between the percentages of respondents giving positive and negative replies.

(a) The indicator is the arithmetic average of the balances (%) for the questions on business situation and recent and expected evolution of demand.

(*) Minimum, maximum and averages are calculated over the period of availability which is not necessarily as from 01/1990.

(a) The indicator is the arithmetic average of the balances (%) for the present and the future business situation, and for stocks – with inverted sign.

(b) United Kingdom: refers to the volume of sales for the time of the year.

(*) Minimum, maximum and averages are calculated over the period of availability which is not necessarily as from 01/1990.

(a) Data are not seasonally adjusted.

(b) The confidence indicator is the arithmetic average of the balances (%) for the questions on business situation and past and expected evolution of demand.

(c) Component of the confidence indicator.

Information

The European Commission publishes the Business and Consumer Survey Results every month. The issues of January, April, July and October also include the quarterly survey results for the manufacturing industry and consumers. The April and November issues also include the investment survey results.

The data of the surveys is processed by the Directorate-General Financial and Economic Affairs (DG ECFIN), Unit Economic situation, forecasts, business and consumer surveys (A4), Sector Business and consumer surveys and short-term forecast.

To obtain additional information regarding these survey results you can contact the European Commission at the following addresses:

Mail: European Commission
DG ECFIN / Unit A4
200, Rue de La Loi
B-1049 Brussels

Email: ECFIN-BCS-MAIL@ec.europa.eu

Website: http://ec.europa.eu/economy_finance/db_indicators/surveys/index_en.htm

Upcoming releases:	Flash Consumer Confidence Indicator	23 August 2013
	Economic Sentiment Indicator	30 August 2013
	Business Climate Indicator for the euro area	30 August 2013
